Effectiveness of extracorporeal shock wave in patients with musculoskeletal injuries. CCOI "FRANK COUNTRY". 2022

Research author: Dr. Marisel Ibarbia Carreras

In order to evaluate the effectiveness of extracorporeal shock wave in patients with musculoskeletal injuries, scientific alternatives are sought that contribute to raising the level of patient satisfaction and improving their quality of life.

These interviews and evaluations will be conducted in person during treatment. The results of the interviews will be available to the Vice-Directorate of Medical Assistance of the Hospital. Not divulging the name of the respondents.

We ask for your consent to participate in such a study.
